Designed for fire detection systems requiring local indication of an individual or group of fire detectors in alarm mode, the VRLU indicator utilises an ultra-bright LED with a wide range of illumination.

The VRLU remote indicator is able to operate with many types of conventional and analogue addressable fire detectors, frequently eliminating the requirement to stock two types of indicator. The VRLU may also be used for other applications requiring a local visual indicator. Process control, security and shut down operations are typical environments where this indicator may be used.

Electrical Specification

Operating Voltage Range : 5 – 28 Volts DC

System	Resistance (Ω)	Setup	Terminals	Current
Conventional	1000	As supplied	1,3	23mA @ 24V
Addressable	0	As supplied	2,3	28mA Max.
Other	1500	Remove LK1	1,3	15mA @ 24V
Other	2700	Remove R1	1,3	8mA @ 24V
